

marClamp® Uro acc. to Kalem

- *Radical prostatectomy*
- *Radical cystectomy*
- *Nerve-preserving operations*

marClamp® Uro  
acc. to Kalem

**SealSafe®** bipolar vessel sealing – low patient stress due to reduced blood loss and shorter operating times.

The **maxium®** and the bipolar vessel sealing current **SealSafe®** from KLS Martin enable you to seal vessels and tissue bundles permanently and reliably.

Radical prostatectomies, radical cystectomies and nerve-preserving operations can thus be performed in less time and with significantly less blood loss. The instrument used is an absolute novelty – the **marClamp® Uro acc. to Kalem**, specially designed for these types of interventions.

The marClamp® Uro acc. to Kalem has already been used for over 200 bipolar radical prostatectomies and more than 60 radical cystectomies. The results are convincing – surgically no less than oncologically and functionally. What's more, the reusable instruments save you real money, thus increasing your cost effectiveness as you go. The practical use of the marClamp, Uro acc. to Kalem is easy to learn.
